FORMER KAISER UNHAPPY IN SECOND MARRIAGE

LONDON, Jan. 26.—(By The Associated Press).—A correspondent of the Yorkshire Evening News, writing to his paper from Doorn, says: "In spite of elaborate efforts to hide the truth I have discovered that the second marriage of the former German emperor has been a complete failure, and that at the present moment he is living in one of his castles while his wife and her children are in another. I am told that a very few weeks sufficed to bring about the breakdown."

Those who are not the ex-kaiser have been struck by the grave alteration not only in his mood but in his character. He is said to have been affected very unfortunately by the operation for gland disease he underwent before his second marriage. His own children have not forgiven him for the second marriage and his step-children avoid him.

"His means are reduced and his private expenditure strictly limited. He is living today under most unhappy family conditions. He can command neither service, affection nor companionship, and the breakdown in his domestic arrangements is painfully apparent to the very few who visit him."

By GEORGE H. MANNING
(Washington Correspondent, Perth Amboy Evening News.)

WASHINGTON, Jan. 26.—Representative Isaac Bacharach of Atlantic City, expects to visit Trenton in a few days and while there will call on Governor Silzer and discuss the situation regarding shortage of coal in New Jersey and alleged profiteering by dealers concerning which the governor and congressmen have exchanged letters. Mr. Bacharach had not received today the letter which the newspapers reported Governor Silzer had sent him in reply to his demand that the governor compel State Fuel Administrator Grier to function in the interest of the people of New Jersey and could therefore not reply to it, Mr. Bacharach said.

The Atlantic City congressman was undecided whether to take as a joke Governor Silzer's suggestion that he come to New Jersey and give his personal attention to the question of coal distribution and prices or furnish the name of a man competent to do the job. When he receives the governor's letter he will reply to it fully and take whatever steps seem possible to aid the governor in allaying the fuel shortage in New Jersey. If he finds that Governor Silzer is sincere in soliciting his assistance, Mr. Bacharach said.

MUSCLE SHOALS IDEA FAVORED

Baruch Recommends Acceptance of Henry Ford's Offer to the Government

WASHINGTON, Jan. 26.—(By The Associated Press).—Acceptance of Henry Ford's offer for Muscle Shoals, provided no better offer is available and conditions on the actual production of nitrate fertilizer at the rate of 40,000 tons a year, is recommended in a special report to the American Farm Bureau Federation by Bernard M. Baruch, war-time chairman of the war industries board.

Mr. Baruch's letter incorporating his views, addressed to Gray Silver, Washington representative of the Farm Bureau Federation, was laid today before the House agriculture committee and was as follows:

"Pursuant to your request I am handing you a report on the situation relating to the development of a nitrate plant at Muscle Shoals. This report was originally prepared several weeks ago, and since then has been reworked by its author, Leland L. Summers, who, I think, there is no man better qualified to judge.

Here is the way it lies in my mind. It is the evident desire of all, and in that I include you, to develop at Muscle Shoals a new source of nitrate. This would exclude any bids or offers that did not carry an obligation to produce and develop commercially a nitrate process. This can be done in the following ways:

By government development. Except as a last resort, I am opposed to this on account of its inherent disadvantages.

By combination of industry, either with government co-operation or independently.

By the Ford development. This appears to be the only offer that has come forward so far from a private source promising development along commercial lines. If no more advantageous offer should be made, the arguments against awarding the contract to Henry Ford would not be convincing.
