FRIDAY, OCTOBER 2, 1903.

The action of the Board of Aldermen in delaying the paving of Washington street, will be generally approved as cold weather will be here before the work could be completed. No loophole should be left open, however, whereby the work can be defeated. A majority of property owners have declared in favor of the improvement and to show them that the aldermen intend to keep faith the contract could be given out with the understanding that work will not start until spring.

Trusts and strikes seem to travel arm in arm. Neither of them are of any benefit to the general public and it seems that until both are abolished the business world will never gain its equilibrium. For years the trolley lines in North Jersey have been operated successfully and the men have appeared satisfied. A short time ago the big Public Service Corporation swallowed them up, formed a trust, and the whole system is now threatened with a strike.

has declared that ragtime die. Why should it? Is ing that drives dull cares away, causes one to forget the trials of this common life or inspires one to patriotic duty quicker than a band or orchestra playing a lively air such as is now called ragtime? And is there anything the American nation needs more than something to relieve the overtaxed mind?

Another building that will be a credit to the city is promised by the Elks. This is progress. The Elks show their enterprise by making such a move. The building will doubtless be a money-making venture and should encourage others to make the same move.

With the factory baseball league, the new amusement company's team and the Marions in the field next year, Perth Amboy will be even more of a baseball town than ever.

EDITORIAL COMMENT.

The new voting machines are said to resemble incubators. Possibly there'll be some political tricks hatched out in them.—Plainfield Press.

The Atlantic City Review takes credit to itself for a large share in the saving of $12,000 per annum to Atlantic City taxpayers by renewal of the public lighting contract at a much lower figure than the old contract. The Review discovered that the lighting contract expired a year sooner than the councilmen supposed it did and gave appropriate publicity to this fact, coupled with argument in favor of a lower rate. This publicity brought outside bidders into the field. Finding that it would have opposition the local company put down its price from $105.65 a light to $75 on which basis the new contract was made.

Here is a case where a live, up-to-date newspaper with the interests of the taxpayers at heart has done a public service of value to every taxpayer and for which it deserves the thanks of the entire community.—Camden Post Telegram.

SOO RIOTS ENDED.

Government Will Extend Aid—Men Will Be Paid Off.

SAULT STE. MARIE, Mich., Oct. 2.—The atmosphere surrounding the Soos during the past week was considerably clarified, chief among the reasons being the bringing about of a change among the employees of the company and a better feeling in local business circles by the announcement made by the Ontario government that arrangements have been completed whereby the company will be extended temporary aid and the men paid tomorrow.

A private wire from F. H. Clergue, who has left Toronto for the Soo, confirms this. The Canadian Soos were placarded setting forth these facts, and the town quietly celebrated the news. Employees in town will be paid immediately, but assigned claims will be carefully scrutinized, and speculators, who have been buying up time sheets for a small percentage, may lose their investments.

The situation in the Michigan Soos has also been greatly simplified. The Michigan Lake Superior Power company will pass into the hands of a receiver at once.

Bandits Leave Victim on Track.

NACO, Ariz., Oct. 2.—J. W. Dooley, a ranch owner, was assaulted and robbed by highwaymen. The robbers then carried his unconscious body to the railroad tracks near by, where they left him, expecting him to be killed and his remains mutilated so as to conceal their crime. Dooley was struck by a train and dragged a hundred feet, but escaped instant death. One arm and one leg were cut off, and he is injured internally.

Trolley Strike Not Likely.

NEWARK, N. J., Oct. 2.—The trolley men of all the divisions of the Public Service corporation's extensive trolley system are voting on the question whether or not to declare a strike. The voting is being conducted secretly at the various local headquarters of the union, and the result will not likely be known today. It is generally believed, however, that the vote will be against declaring a strike.

Saturday

ALWAYS AN EXCEPTIONALLY BUSY DAY AT

LITIGATION MULTIPLIES.

Standard Fireproofing Company Asks For Receiver for Another Penfield Concern.

REQUEST IS GRANTED.

Another phase in the financial dealings of Raymond C. Penfield was brought to the attention of the United States court Wednesday through a petition filed by the Standard Fire Proofing company, of New York, asking that a receiver be appointed for the Manhattan Brick and Terra Cotta company, another New York concern, which was part of the trust of which Penfield was the head.

The Standard Fire Proofing company holds a note of the defendant company for $30,595.42 which is past due and which, it is claimed, as a result of the financial transactions of Penfield, the latter is unable to pay. It is claimed by the Standard Fire Proofing company that Penfield caused to be improperly used $75,000 in stocks and upon this issue, it is claimed, he realized considerable cash, making the Manhattan Brick and Terra Cotta company insolvent.

Judge Kirkpatrick granted the petition and appointed as receiver the Continental Trust company, of New York.

FEDERAL BUILDING IN NEW BRUNSWICK.

Postoffice is Moved and Finishing Touchss are being Added to the Structure.

New Brunswick, Oct. 2.—Mail was delivered from the new post office building, at the corner of George and Albany streets, yesterday for the first time. During the night all mail matter in the old office was moved, together with some of the old furniture and mail racks that will be used until the new furniture is installed. The building is not entirely completed, but the work of finishing it is rapidly going on, and it will not be long before the building will be entirely completed.

This is New Brunswick's new federal building and the citizens are very proud of it. The appropriation was secured through the efforts of Congressman Howell. It is expected that as soon as Mr. Howell returns to Washington he will set the machinery in motion for the building which has been authorized at Perth Amboy.

CRESCENT SHIPYARD MAY OPEN

Rumor that the Plant at Elizabethport may Again be Operated.

Elizabeth, Oct. 2.—It is currently reported here that the Crescent Shipyard will reopen a week from next Monday. It is said that the Fidelity Trust and Guarantee Company, which, it is said, furnished bonds for the shipyard for the completion of all its contracts, will accept the government's proposition to have the unfinished work on the cruiser Chattanooga and the torpedo boats O'Brien and Nicholson completed at the Crescent Yard. This company is also responsible for the completion of the Mexican gunboats, Tampico and Vera Cruz, which are about eighty per cent finished. The Mexican Government, it is claimed, while annoyed over the delay in the completion of the two war vessels, knows that the Fidelity company must see to it that the contracts are carried out to the letter, and on this point is not giving itself much concern.

Colonel Pope, of bicycle fame, recently said that the first essential to business success is "advertising;" that the second essential was "big advertising;" and the third, "bigger advertising."
