

THIS DAIRY IS COMPLETE.

Walter Mullins Maple Hill Dairy
Described for News
Readers.

IMPROVEMENTS MADE.

A visit to the Maple Hill Dairy, owned by Walter Mullins, is well worth the time. The place is situated on the Metuchen road close to the city line within the limits of Perth Amboy. A spring of the purest water is within thirty feet of the building. This water has been analyzed by experts and pronounced aqua pura. It is bottled up and sold. All the physicians of this place recommend it. Within a short time a machine for making selzer will be installed.

The dairy itself is a model of its kind. Constructed mostly of stone and whitewashed constantly within, it is a shining example of cleanliness. When an Evening News reporter entered in company with Mr. Mullins, the floor had just been washed and steamed. A rubber hose is used in the steaming. It throws a column of steam and generous application of the scalding vapor keeps the building well sterilized.

The bottles, about 600 in number, are cleaned in two large tanks of hot water. About 10 o'clock in the morning this work begins. They are washed and re-washed by a steam brush, making 1,600 revolutions per minute. This brush is run by steam. After this they are, one by one, placed over a jet of steam and sterilized. A long rack, taking eight rows of bottles, is used next. On it the bottles are placed. During the winter filling is done in the night, in summer the work is done early in the morning.

The method of filling the bottles is perfect. The employees wear clean white aprons. The long slate table has a mechanical device which runs along over the bottles. It is a sort of tank of metal and having eight tubes which are connected with eight bottles by pressing a lever. The bottles are all filled in a quarter of a minute. After filling one row the

tank is moved along and eight more are filled. By this means work which formerly required three hours is now done in one. The milk is kept in a reservoir of spring water which is always the same temperature.

A four horsepower engine supplies power for making butter, separating cream and running the bottle washer. A steam butter churn turns out sixty-five pounds of butter. This is used mostly in the summer months. The steam cream separator turns out a quality of cream unequalled about here. It is thick and rich.

In one corner of the room there is a vat used to make pot cheese from skim milk taken from the separator. This product finds a large market. Mr. Mullins has a great demand for sweet butter among the Hungarians and Poles.

The dairy room has a clean, sweet, wholesome odor and is very attractive to the visitor.

Milk is brought by train from Clinton daily. Blooded Jerseys supply all the milk handled by Mr. Mullins.

Four wagons, designed with a special eye to absolute purity are used to deliver. Delivery begins at four in the morning. The horses are kept in the same manner as the wagons and harness that is in the best condition possible.

Mr. Mullins has been in business about eight years. His trade has grown rapidly because the known purity of his milk and freedom of establishment from impurities of any kind. He has from time to time installed improvements. Shortly he expects to install a pasteurizer which treats milk for infants and invalids and exterminates any germs. These improvements will cost nearly \$700 and are to be made in order to sustain the reputation of the dairy as the best in these parts. —adv

The Passing of Red Cloud.
PINE RIDGE AGENCY, Neb., Dec. 21.—Red Cloud is dying in a tepee in a corner of the yard surrounding the little wooden house which the government built for him here many years ago. He is eighty-five years old, almost blind, scarcely able to hear and broken in health and spirit. His once alert mind is befuddled and feeble. Death is likely to occur at any hour.

Fireman Held as Firebug.
KEENE, N. H., Dec. 21.—Fred P. Amadon, a fireman, has been arrested here charged with incendiarism. The arrest follows an investigation into the origin of three small fires that broke out during the night and which the police say were set. The city has been terrorized by an incendiary who has for some time escaped detection.

GORMAN ON PANAMA.

Senator Says Senate Has Not Yet Recognized Republic.

ROOSEVELT SENDS DOWN DOCUMENTS

Confirmation of Buchanan as Minister to Isthmian Republic Barred by Want of Senate's Approval, Although He Is En Route.

WASHINGTON, Dec. 21.—The House has received from President Roosevelt the third installment of papers relating to the recent revolution on the isthmus of Panama. They comprise the correspondence between the state department and Minister Baupre at Bogota relative to the Hay-Herran treaty.

Secretary Hay telegraphed Mr. Baupre to notify Colombia on April 7 last that the matter of requests made by Colombia to canal and railroad companies for appointment of agents to negotiate cancellation of the present concessions was covered by the treaty.

On April 13 Mr. Baupre reviewed again at length the feeling in Colombia toward the treaty. On its negotiation he says, "I am convinced the public had never expected better terms."

In a later communication on the subject of public opinion adverse to the treaty Mr. Baupre says: "It is utterly impossible to convince these people that the Nicaraguan route was ever seriously considered by the United States; that the negotiation concerning it had any other motive than the squeezing of an advantageous bargain out of Colombia, and that any other than the Panama route ever will be selected."

The senate in a session for the consideration of executive nominations has voted to reconsider the vote by which William L. Buchanan of New York had been confirmed as envoy extraordinary and minister plenipotentiary to the new republic of Panama.

The nomination of Mr. Buchanan was sent to the senate by the president a few days ago. It was confirmed without opposition, and Mr. Buchanan has already received his credentials and is en route for his post.

Senator Gorman's action moving a reconsideration of the vote by which the nomination was confirmed came like a thunderclap. He rose at his place in the senate and first called attention to the fact that Mr. Buchanan's nomination had been confirmed. He said it had "slipped through" without the knowledge of any of the senators on the Democratic side and, he believed, with the knowledge of a very few senators in the chamber. He said that a very grave question had been raised in the senate as to whether the new republic of Panama ought to be recognized, and the senate had taken no vote on this question.

TURKEY'S APOLOGY.

Porte Has Agreed to Demands of Minister Leishman.

REGRETS FOR INSULT OFFERED DAVIS

Governor of Alexandretta Gets Orders to Call on Consul on His Return and Make Amends for Attack by the Local Police.

CONSTANTINOPLE, Dec. 21.—The porte has agreed to the demands of the United States government and has ordered the governor of Alexandretta to make ample apology to Consul Davis for the insults offered him and the assault committed upon him by the local police of Alexandretta while the consul was accompanying on board a departing steamer a naturalized American citizen named Attarin, who had been liberated from prison through the intervention of Mr. Davis.

United States Minister Leishman arrived at a friendly understanding in the premises with Tewfik Pasha, the Turkish foreign minister, who agreed to his demands.

The porte notified the United States legation orally and in writing of the instructions telegraphed to the vali of Aleppo to order the governor of Alexandretta to call on Consul Davis immediately after his arrival at Alexandretta and offer to him a complete apology. The porte has also promised to punish the police officials who assaulted Consul Davis and will allow Attarin to depart unhindered.

The United States cruiser San Francisco, with Rear Admiral Cotton, which has left Beirut for the purpose of taking Consul Davis to Alexandretta, is expected to arrive there, and if the Turkish government carries out the programme it has formulated the Alexandretta incident may be considered closed. It is felt here that delay or complications are not likely, but Rear Admiral Cotton has received instructions to meet all eventualities.

CONDENSED DISPATCHES.

Women have carried off the larger proportion of honors in the London university examinations.

Preparations have been completed for a complete test of rival types of submarine boats off Newport, R. I.

Nasir Ali Khan, prince of Rampur, India, is in New York visiting Mrs. Durven, mother of his university companion at Oxford, England.

The withdrawal of Mr. W. C. Whitney and Mr. James and Mr. Foxhall Keene from the British turf has called forth many expressions of regret.

Alleging that defalcations of a trusted employee had made the action necessary, Lighthouse and Foulke, cotton brokers, have announced their suspension.
